

UNIVERSAL STAINLESS - CANONSBURG, PA

PROJECT DESCRIPTION

FORTA-FERRO[®] was used to reinforce an interior slab-on-ground application for this steel plant manufacturing floor. The manufacturing floor was in need of an **extremely durable concrete floor with above average impact resistance** due to the heavy manufacturing equipment used daily. After taking the plant's concerns into account, specifiers chose to reinforce the slab using FORTA-FERRO[®]. The fiber reinforcement solution was able to **replace traditional steel reinforcement methods** that are difficult and cumbersome to place, unlike FORTA-FERRO[®].

KEY POINTS

- Impact Resistance
- Superior Durability
- Easy Mixing and Placement Ability

DETAILS

Date: August 2015

Location: Canonsburg, Pennsylvania

Dosage: 4.0 lbs. / cu. yd.

Fiber: FORTA-FERRO[®] 2-1/4"

Application: Slab-on-Ground
