

ENERGY DRINK FACTORY - PHOENIX, AZ

PROJECT DESCRIPTION

Lagerhaus in Phoenix, Arizona specified FORTA-FERRO reinforcement fibers at a dosage of 7.5 lb/cu yd in this slab-on-ground application. **Replacing the need for traditional steel reinforcement** was crucial in this new construction. **An extended joint system was implemented to meet the automated racking system's requirements.** Contractor, Suntec believes in FORTA products and were pleased with the finishing capabilities provided by "The Original Name in Fiber Reinforcement – FORTA-FERRO."

KEY POINTS

- Increased Durability
- Replaced Traditional Reinforcement
- Extended Joints

DETAILS

Date: 2021
