

This presentation is a guide for the use of synthetic macro fibers as an alternative to steel reinforcement. Additionally, this program will include a study of fiber types, performance, and nuances that can offer an educational platform to determine the best practices for decorative concrete applications.

PROGRAM: "Synthetic Macro Fiber for Decorative Concrete" - Part 5

CREDIT: 1 Continuing Education Unit

LENGTH: 60 minutes

COST: No charge for qualified groups

This presentation is brought to you by FORTA Corporation.
