

## Southwire North Campus Warehouse

**Date:** 2023

**Location:** Carrollton, GA

**Advantage:** Impact  
Resistance, Increased  
Fatigue

### Technical Specifications

**Application:** Slab-on-Ground

**Fiber Reinforcement:** FORTA-FERRO<sup>®</sup> 2-1/4"

**Dosage:** 7.5 lb/cu yd

**Replaced:** Specified Steel

**Total Project Size:** 50,000 yds

**Slab Thickness:** 8"

**Delivery Method:** Tailgated

**Finishing Method:** Troweled

Having used **FORTA-FERRO** reinforcement fibers for many years, this contractor worked with FORTA engineers to meet the loading requirements of the owners. This large manufacturing company needed to reinforce their heavily loaded floors from early onset stresses. FORTA-FERRO macro synthetic fibers are **non-corrosive** and provide **increased fatigue and impact resistance**, while enhancing the aggregate interlock.
