

# US Cold Storage Facility

Date: 2019

Location: McDonough, GA

## Technical Specifications

**Pavement Thickness:** 5.5"

**Fiber Reinforcement:** FORTA-FERRO® 2-¼"

**Doasge:** 4.0 lb/cu yd

**Jointing Spacing:** 5.5 ft x 5.5 ft

**Total Project Size:** 270,000 sq ft

**Finishing Method:** Broom Finish

US Cold Storage specified the OptiPave System with FORTA-FERRO macrosynthetic fiber for an expansion of their distribution facility in McDonough, Georgia, due to its **improved long-term performance, sustainability** and **reduced cost**. The OptiPave System will provide this owner with a heavy-duty pavement that is designed to handle the repeated truck loading expected at this facility, by **increasing the pavements fatigue resistance** and **significantly reducing curling**.

TCPavements, OptiPave System for Industrial Pavements, is licensed in the United States by PNA in collaboration with FORTA.
