AFTER

HONOLULU BUS PAD - HONOLULU, HI

PROJECT DESCRIPTION

The City of Honolulu chose FORTA-FERRO to reinforce the bus pad on King Street in Honolulu, HI. FORTA-FERRO macro synthetic fibers were used at a dosage of 7.5 lb/cu yd in this slab-on-ground. Fibers were specified for this job because the city was looking for a way to **reduce cracking**. FORTA-FERRO fibers perform so well that the contractor could **eliminate steel rebar or mesh** and the city **saved time and money**.

KEY POINTS

- Reduced Cracking
- Saved Time & Money
- Eliminated Steel

DETAILS

Date: 2010

Location: Honolulu, HI

Dosage: 7.5 lb/cu yd
