

SKY PARK - MALAYSIA

PROJECT DESCRIPTION

Sky Park is a modern retail and office space that is also being developed into apartments in Cyberjaya, Malaysia. This unique development spills over 11 acres of land where six individually designed buildings connect to each other. This multi-building development is scheduled to be completed by the end of 2017. ECONO-NET[®] was used to reinforce a topping slab for Sky Park, specifically for its **excellent crack control and the ability to reduce concrete shrinkage issues.**

KEY POINTS

- Reduced Cracks
- Mixed and Pumped Easily
- Cost Effective
- Reduced Shrinkage Issues
