

Sather Concrete

Date: 2023

Location: Merrifield, MN

Advantage: Time Saving,
Easy to Use

Technical Specifications

Fiber Reinforcement: FORTA-FERRO[®] 2-1/4"

Application: Precast

Dosage: 3.0 lb cu/yd

Delivery Method: By Hand

Producer of septic tanks and lids, Sather Concrete mixes and pours about 15 yards of concrete daily. They mix their own concrete on site by adding one 3lb. bag of **FORTA-FERRO** reinforcement fibers per one yard batch of concrete. By **eliminating wire mesh**, they don't spend time cutting and bending cumbersome mesh to fit inside their forms, while also making sure it is properly installed.
