

Chicken Farm

Date: 2023

Location: St Henry, OH

Advantage: Storage Costs,
Decreased Labor

Technical Specifications

Application: Slab-on-Ground

Fiber Reinforcement: FORTA-FERRO[®] 2-1/4"

Fibers Specified: Replaced 8G Wire Mesh

Dosage: 3.0 lb/cu yd

Slab Thickness: 6"

Delivery Method: Tailgated

Finishing Method: Steel-Troweled

With unpredictable supply chain and inflationary issues over the past few years local farmers in the area have opted to forgo steel reinforcement in their concrete projects. FORTA Engineering team provided a conversion for the project when the mesh was not available. Known as the **easiest mixing and finishing fiber** on the market, **FORTA-FERRO** also offers these owners **decreased labor and storage costs**.
