

GETGO FUEL DEPOT - ERIE, PA

PROJECT DESCRIPTION

The numerous freeze-thaw cycles of Erie, Pennsylvania can wreak havoc on concrete. To combat this, GetGo specified FORTA-FERRO macro synthetic fibers at a dosage of 4.0 lb/cu yd in this newly constructed fuel depot. Known for its **long-term durability**, FORTA-FERRO also offers structural enhancements and will be effective at **preventing rutting** in this 330 yd project. The concrete was tailgated into place and owners were happy with the heavy broom finish.

KEY POINTS

- Extreme Durability
- Reduced Rutting
- Superior Finish

DETAILS

Date: 2021

Location: Erie, PA

Dosage: 4.0 lb/cu yd

Fiber: FORTA-FERRO® 2-1/4"

Application: Pavement
