

MANHEIM HIGH SCHOOL - MANHEIM, PA

PROJECT DESCRIPTION

Manheim High School specified FORTA-FERRO macro synthetic fibers when renovating and adding a new addition to their facility. Over the course of three years, **2,000 yards of reinforced concrete was pumped, tailgated, and received a troweled finish at a dosage of 3.0 lb/cu yd.** FORTA reinforcement fibers are known for their ease of use and superior ability to reduce cracking. Ease of use was critical to this project as it was the first time this ready mixer had used FORTA products.

KEY POINTS

- Ease of Use
- Reduced Cracking
- Increased Durability

DETAILS

Date: 2021

Location: Manheim, PA

Dosage: 3.0 lb/cu yd

Fiber: FORTA-FERRO® 2-1/4"

Application: Slab-on-Ground
