

Wyatt, Inc.

Date: 2023

Location: Smithton, PA

Advantage: Cost Savings

Technical Specifications

Fiber Reinforcement: FORTA-FERRO[®] 2-1/4"

Application: Slab-on-Ground

Dosage: 3.0 lb/cu yd

Total Project Size: 200,000 sq ft

Replaced: Specified 6x6 Wire Mesh

Delivery Method: Pumped & Tailgated

Finishing Method: Steel-Troweled

The use of **FORTA-FERRO** reinforcement fibers allowed for faster placement of the concrete and will give owners a **better wearing surface** on the slab. Even though this project was completed in a Northeast winter climate, the mixing & finishing capabilities of this macro synthetic fiber grant **increased ease of use and placement**.
