Sky Harbour, a private hangar developer/operator, has opened a 15-acre private hangar complex at Nashville International Airport. Its newly finished complex offers 150,000 sq ft of private and semi-private turnkey hangar space consisting of 13,350 sq ft hangars, each capable of sheltering and loading the latest ultra-long-range business jets. This 10" 4000 psi slab-on-ground was jointed 15'x15'. The addition of **FORTA-FERRO** macro synthetic fiber gives the architects, owners, and their clients the confidence they are demanding to have a beautiful **crack-free**, epoxy coated finished hangar floor for their luxury jet and prop planes.
