Papé is the authorized dealer for Kenworth's heavy-haul equipment in the Pacific Northwest. The owners chose to use **FORTA-FERRO** in the construction of their new location to create a **durable, Stronger Lasting™ pavement** while **minimizing** the **traditional steel rebar** needed for their heavy-load truck demands. A large portion of these slabs also include hydronic heat over two inches of insulation.

**World-class design services, on-site support. *Contact us to learn more.***
