

Triad Machinery

Date: 2023

Location: Sumner, WA

Advantage: Cost Effective,
Superior Broom Finish,
Easy to Use

Technical Specifications

Application: Pavement

Fiber Reinforcement: FORTA-FERRO[®] 2-¼"

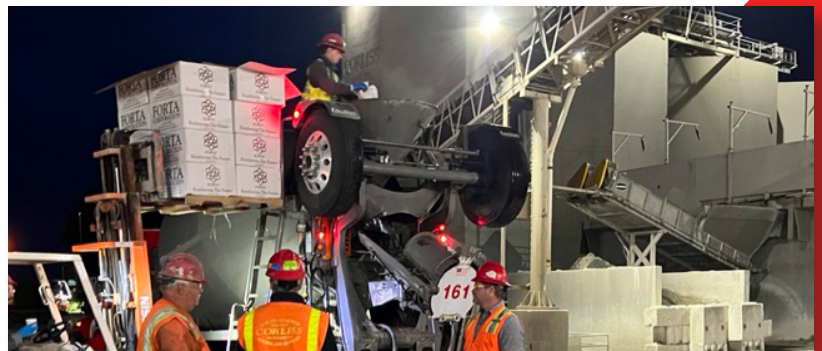

Dosage: 7.5 lb/cu yd

Replaced: #4 rebar 10" O.C.

Delivery Method: Pumped

Finishing Method: Broomed

The General Contractor requested **FORTA-FERRO** in the concrete apron to **eliminate the use of steel reinforcement** in the original design. FORTA's macro synthetic fiber creates a **Stronger Lasting™ concrete** that will handle the load of the heavy machinery onsite. This fiber helped **optimize the original design** and allowed for a **superior broom finish** that contractors were still able to use to cast their panels.
